FLIGHT TRAINING RATES & DETAILS

Initial Private Pilot Rating considerations and package:

FAA Requirements to Obtain a Private Pilot Certificate (Summary)

1. Be at least 17 years of age
2. Be able to read, write, and converse fluently in English
3. Obtain at least a third-class FAA medical certificate or Basic Med
4. Receive and log ground training from an authorized instructor or complete home-study course
5. Pass a knowledge test with a score of 70% or better.
6. Accumulate appropriate flight experience
7. Receive a total of 40 hours of flight instruction and solo (10 hours of 40) flight time and demonstrated skills in accordance with FAA Private Pilot – Airplane Airman Certification Standards https://www.faa.gov/training_testing/testing/acs/
8. Successfully complete a practical (flight) test given as a final exam by an FAA inspector or designated pilot examiner and conducted as specified in the FAA's Private Pilot Practical Test Standards

Private Pilot Test Preparation (home-study course):

For academic preparation for your Private Pilot Written test we recommend the King School on-line curriculum. The written test is typically the most significant challenge for most students to get accomplished in a timely manner prior to their practical/Flight Test. If you mention our flight school name "Diamond Flight Center of Texas" in ordering your ground school from King School you will receive the appropriate King Online Flight Test course for free (\$139.00 value) with the purchase of a Ground School and Test Prep course (\$279.00). - <https://www.kingschools.com/>

– Call King School and Mention DFCT for your free Test course: 800-854-1001

DFCT Private Pilot Package Estimate:

While 40 hours (30 hours with flight instructor, 10 hours solo) is the minim required by the FAA for a private pilot license. 55 flight hours is the actual national average. A ground school course can considerably reduce the amount of needed one-on-one ground instruction with our certified flight instructors. Given these considerations, DFCT estimates your Private Pilot Training will cost the following all based on our Platinum best rate package prices in page 1:

- 40 Flight Hours = \$7,400
- 30 hours Flight Instruction and 20 Hours Ground Instruction = \$3,150 (Assumes ground school course such as King's course is accomplished via self-study on-line)
- Practical Test = \$700 paid directly to DPE
- Academic Materials, FAA Written Test and personal items additional cost
- **Total estimate = \$10,550**

Note: Many flight schools will advertise prices based on lowest flight hours and no ground training yet once training occurs the cost will be higher.
